

November 2016

Tree plantation @ JRHS

October 14th, the John Rennie Jr. Green team in collaboration with Quadra and Pepinière Des sources planted 10 maple trees, 3 Autumn Blaze, 3 Sugar Fall Fiesta and 4 Red Sunset, on our school grounds.

Everything went great. Trees were delivered by Cramer. Students helped unload. Pepinière des Sources dug 5 holes and students 5 holes. Students from JR green Team planted the trees and added hay and wood chips. All trees are planted.

This will allow us to provide shading for the students who wish to eat or relax outside. It will also help cool our school on the hot school days. As for the students it will be another way to connect them to our school and reinforce their sense of ownership. Finally, it will also help us make the geography curriculum more hands on because we talk about the production of maple sirup and how important it is to the Quebec economy.

Thank you so much Quadra and Pépinière des Source for your donation.

Jean-François Pépin
